EGW SERIES  
WELDING CYLINDER BODY  
© 2002 H&H Sales Company, Inc.

**1 Ton Chassis Cab**

**1 Ton Tilt Cab**

**1 1/2 - 2 Ton Chassis Cab**

A 1250 lbs. capacity in-bed lift platform (shown with optional hinged ramp) eases the task of loading cylinders. The hydraulic control provides a smooth lift and a safety lock keeps gate securely in place.

## **Steel welding cylinder body features in-bed lift platform**

The EGW Series welding cylinder body makes servicing your acetylene and oxygen customers simpler than ever before. You'll especially appreciate the 1250 lbs. capacity lift platform which eases the job of loading cylinders. Powered by your 12-volt battery, the lift gate features hydraulic control for smooth operation, as well as dual manual safety locks.

EGW cylinder bodies are available in steel and come in the length you need — 10', 12' or 14' — designed to fit your 60", 84" or 108" CA chassis respectively. Larger custom bodies are also available. H&H constructs the body with 2" square tubular railings

with tie-down loops to secure cylinders. Also available is an E-Track System for securing cylinders to front and side walls. The bar-grated floor is supported by 2" structural steel and gives you a weight savings of 1.4 lbs. per square foot over steel tread plate flooring. If you prefer, we can build your welding body with a 3/16" or a 1/4" diamond plate floor instead.

As standard features on the EGW Series, H&H offers moisture and vapor-proof FMVSS 108-approved clearance and safety lighting, 14 ga. diamond steel underbed fenders, (bar-grate floor only) and (8) D.O.T. flip-type placards

("Flammable", "Oxygen", "Non-Flammable" and "Please Drive Safely").

If you want to make your delivery truck even more versatile, check out some of the available options. There are steel underbed tool boxes that can be equipped with shelves, divider trays, or 6-drawer hanger assemblies; cylinder rail liners. Or you could add chock blocks, a first aid kit, a triangle kit, polyester cylinder binding straps, a 10 or 20 lb. fire extinguisher, or custom paint.

However you spec it out, the welding cylinder delivery truck makes the work go easier. We've been serving the welding industry for over 50 years.

## EGW Series Welding Cylinder Body

### Begin With The Cab-Chassis Of Your Choice

Buy the cab-chassis and ship to us ... or select what you need from the truck manufacturer's manual, and we'll get it for you. And ... for less than you'd expect!

### Series EGW Steel Specifications

Overall width .....	96"
Overall length .....	10', 12' or 14'
Overall height (Floor to top of railing) .....	38"
Floor height above frame at rear axle .....	8"
Lift platform dimensions .....	24" x 44"
Steel body weight:	
#2200026 Model EGW-10 .....	2180 lbs.
#2200027 Model EGW-12 .....	2460 lbs.
#2200028 Model EGW-14 .....	2750 lbs.
Tool box weight:	
18" x 18" x 30" (for 60" CA) .....	70 lbs.
18" x 18" x 36" (for 84" or 108" CA) .....	80 lbs.
18" x 18" x 48" (for 84" or 108" CA) .....	100 lbs.

Truck chassis size ..... 60", 84" or 108" CA

#### CONSTRUCTION

Floor .....	3/16" x 1" steel bar-grating
Floor .....	3/16" or 1/4" diamond steel plate
Floor channel cross members .....	2" structural steel
Bed Rails .....	2" square tubing
Clearance and safety lighting .....	I.C.C. Standards

### Standard Features

**Lighting and Safety Lock** — D.O.T. approved clearance and safety lighting is moisture and vapor-proof with molded hard rubber dock bumpers for body protection. A safety lock mounted to body keeps lifting platform in upright position when not in use.

**Wheel Fender and Heavy Duty Mud Flaps** — Underbed wheel fenders are constructed of 14 gauge diamond steel and are standard on grated floor models only.

### Efficiency Options

**E-Track System** — When used with specially fitted ratchet straps, it provides a versatile and secure cylinder binding system.

**Underbed Tool Box** — Lockable 12 gauge steel underbed tool boxes can be customized with shelves, divider trays, or 6-drawer hanger assemblies.

**Ratchet Straps** — Various sizes and types of ratchet straps are available for both the Tie-Down Loop or E-Track Systems of cylinder binding.

**Rubber Chock Blocks** — Molded of hard rubber and easy to store and use.

**Removable Cylinder Safety Rail** — Used when loading and unloading to keep cylinders from toppling over. The removable rail when positioned at rear of lifting platform serves as an end gate. Safety straps are recommended when using this system.
